Explore the power of Intelligence....

Toll Free Service

This service shows the new function in charging, a call to a service subscriber will be paid by the called party

- 1800-XYZ-ABCD
- Service accessible from network of Private Operators also.
- Ideal for big Enterprises who values Customer Care

Universal Access Number

A call to a service subscriber will be paid by the calling party or split between the calling and called party.

- 1860-XYZ-ABCD
- Service accessible from network of Private Operators also.
- Cost effective business promotion tool
- Ideal for Enterprises who values Customer Relations

Our advanced features offers a bundled solution that can help your organization track calls, route calls based on your organization's needs, and safeguard your traffic against long-term service interruptions. Moreover these also help in reducing your overall expenditure significantly on Customer Support Services. Some of the features available with Toll free and Universal Access Number are:

Single All India Number - A single 11 digit number accessible throughout India. No STD facility required to access the service

Time of Day/Time Interval Routing - allows organizations to route calls to different answering locations, depending on the time of day. For example, if your customer service department is closed, you can route callers to alternate location.

Day of the Week Routing -Calls can be routed not only as per the Time of the day but also as per the type of day.

Origin Dependent Routing - Calls can be routed to set of destinations based on the origin of the call.

Call distribution - allows your organization to route calls based on staffing levels. If one location is short-staffed, you can split calls such that these calls go to two or more answering locations. The call split is based on a percentage distribution that you designate.

Line hunting - allows organization to have one or more installations where the call may be an-

Call limiter - Restricts maximum number of simultaneous calls, Time Limit per Call, Max no. of calls in a duration and this helps organization to dimension resources

Call Queuing - enables calls meeting busy condition or reaching call limiter to be placed in a queue and as soon as free condition is detected the call is answered

Condition based routing - Calls at the destination can be re-routed to a different destination number in following conditions (1) Busy (2) No Answer (3) Reached call limiter.

Black & White List - allows your organization to selectively block incoming calls from specific originating areas. In this way, you can shape your area of toll-free/UAN coverage to match your potential callers and also save on the cost of handling unnecessary calls.

Incoming Grey list - When a calling line is added in the grey list , a PIN is associated with it. When a caller from grey list access the service , a PIN is asked for authentication.

Detailed Bill - Details of calls received is provided. This helps organization in marketing and business planning

Virtual Private Network

For connectivity between two or more places using a previously established, shared network infrastructure

- 1801-XYZ-2 to 6 Digits
- Cost effective business communication service
- Translation of multiple private numbers to one public directory number mechanism
- Multi-site Organization - Many sites belonging to one single VPN Network where the site can be located at different physical location in the country.
- Short Group Numbers - These are public directory nos. which are not a part of VPN Network but are given a short number which is defined at Company level.
- Date & Time Screening - Date and time slices for incoming/ outgoing calls where VPN users are allowed to make/receive calls.
- Exception List - The lists which contain the numbers which are not allowed for incoming & outgoing calls.
- Call Duration Control - Threshold can be set for accumulated incoming/outgoing calls.
- Multiple Account Codes - This feature allows the company users of a given VPN group to mark their calls according to business so that subscribing companies receive a bill, which details the cost of communication according to the company activities and the company organization
- Dual Invoicing - This is the ability to bill calls made by a given company member either on the corporate account or on the VPN member personal account.
- Call Forwarding from one VPN number to another
- Hunting List - A series of numbers may be defined in Hunting list for incoming calls per VPN user.
- Substitution : This feature allows mobility of VPN user in their company by providing the VPN access from handset of any other VPN user of that group.
- Preferred External Destination (PED) - If there exists a number which is not a part of VPN Network but is frequently called then it can be defined as PED in the network at a particular site.
- No call charges for management functions.

PREMIUM RATE SERVICE (PRM)

This is a service that can be accessed by telephone subscribers all over the country on new Intelligent Network platform. The PRM service will facilitate service providers to offer service like forecast, future, share market, job consultation etc. The service provider is allotted a PRM service number (1867-XYZ-ABCD) by the network operator (BSNL) and that number can be accessed from any point in the network. For this service, call charges will be at a higher rate (these charges will be borne by calling users) i.e. premium rate and the revenue earned is shared between service provider (receiver of call) and network provider (BSNL). For the same PRM service number, the subscriber can have a number of destination numbers. Other features are:

1. This service is available on any existing telephone line and does not require any additional line.
2. Any user in the telephone network can call PRM number.
3. All charges are paid by the calling user.
4. Charges from out of station call are as same as existing STD rates in BSNL plus premium rate choice by the service provider (receiver of call).
5. Minimum period of hire of the service will be one month.
6. **Access Code: 1867-XYZ (XYZ – SCP code).**
7. **Total digit for service is 1867-XYZ-ABCD**

TARIFF:

1. Activation Charge	Rs.3000/-
2. Fixed Monthly Charges	Equivalent to the monthly rental of an ordinary line applicable to different exchange system capacity.
3. Fixed PRM Charges Per Month	Rs.500/-
4. Minimum Hire Period	One Month
3. Any modification, addition, and deletion in time dependent routing, origin dependent routing and all such available features	Rs.100/- per addition/per deletion
4. Pulse duration (Depending upon the premium service Type)(Applicable on the new IN platform as well)	2, 3, 4, 8, 30, 60 & 90 seconds per unit call
5. Call charges	Rs.1.20 per pulse
6. All the other miscellaneous charges including Vanity number	As in case of Free Phone, UAN etc.
7. Revenue share on graded basis to customers of Premium Rate Service Monthly billed MCUs to IN subscriber per month	Revenue Share (In Rs.)
(a) Up to 1 Lakh	0.20
(b) 1 to 5 Lakhs	0.30
(c) >5 to 10 Lakhs	0.40
(e) >10 Lakhs	0.50

TELEVOTING SERVICE

Tele voting is a service by which a telephone subscriber can indicate his opinion on any matter by dialing an IN number of the service subscriber followed by a single digit for the opinion. This service is very useful where large number of TV programs are operating incentive schemes to increase/retain their viewers. Service provider can get the choice by calls made by public on per day/per week/per month in percentage. Other features are:

1. This service is available on any existing telephone line and does not require any additional line.
2. Any user in telephone network can call televoting number.
3. All charges are paid by the service receiver who receives the call.
4. Charge for the call is same as the existing Local/STD rates in BSNL.
5. **Access Code for Televoting (Pollster Pays) is 1803-424, for Televoting (Voter Pays) is 1861-424 & for Premium Televoting (Voter Pays) is 1862-424.**
6. **Total digit for Televoting (Pollster Pays) is 1803-424-ABCD, for Televoting (Voter Pays) is 1861-424-ABCD & for Premium Televoting (Voter Pays) is 1862-424-ABCD.**
7. **Two MCUs will be charged to customers voting on IN No.1862-424-ABCD**
8. **Vanity numbers are available for selection of ABCD on charge basis.**
