No. (EB-M)/1-12/Radio Modem/2016-17

dated 03.01.2019

To,
All CGMs
BSNL

Sub: Procurement of radio modems by Circles.

Kind reference is invited to the letter of even number, dated 17.09.2018, vide which Circles were asked to stop purchasing/taking on rent of Radio Modems for Enterprise Business, at local level.

This office is in receipt of requests from some Circles to permit purchase of Radio modems at local level.

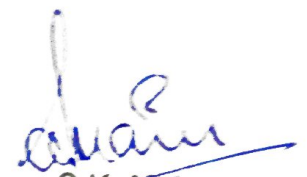

In addition to the benefits listed in the referred letter, following advantages are there in the radio modems being procured centrally:

- i. For Category-I (1) Point to Point (PTP) radio set of 10Mbps aggregate throughput – Product offered – ePMP 1000 can give aggregate throughput up to 80 Mbps and therefore can also be used under category –I (2) Point to Point radio set of 25 Mbps aggregate and has all the features and advanced QoS, VLANs etc.
- ii. Complete product platter shall be available along with NMS for complete end-to-end FCAPS which will help to have immediate inventory control, link-wise performance monitoring, seamless provisioning and Geo-Physical view along with alarm & SLA management.

Keeping in view above and other advantages of centralized solution, it is reiterated that purchasing/taking on rent of Radio Modems for Enterprise Business, at local level, should be stopped immediately.

This is for your kind information and necessary action please.

This has approval of the competent authority.
